Final MPGe = Officially recorded fuel and/or meter, all penalties confirmed

NOTE: BEVs and PHEVs driving only on electricity need to achieve at least 104 MPGe to meet 200g GHG maximum based measured MPGe

Efficiency Event

Penalties:

- RMS cumulative drive cycle error
- Working on vehicle outside pit lane
- Pushing vehicle outside pit lane
- Significant safety incident
- Exceeding 95 degree F cockpit temperature
- Pit lane speed violation

Range Event

Penalties:

- Failure to complete "at speed" laps in less than 2:10
- Laps completed in less than 1:50
- Failure to complete "in" laps in less than 3:10
- Failure to complete "out" laps in less than 3:10
- Exceeding 95 degree F cockpit temperature

Note: 0 -60 mph acceleration minimums = 15 s Mainstream; 18 s Alternative

Note: Accident avoidance maneuver minimum speed = 45 mph

Note: In competition classes where only one team remains, no combined efficiency event is held

Note: Penalties only applied to teams who finish the event. Teams not completing the full 50 laps still move on to validation stage

dnf = Did Not Finish
A.S. Class = Alternative Side-by-Side Class
A.T. Class = Alternative Tandem Class
M. Class = Mainstream Class
